THE STAR FRUIT DRYER.

This Dryer commends itself to every person who examines it. Every family who has an orchard, vineyard or garden ought to have one. It will supersede the canned fruit, as fruit and vegetables dried on this machine retain their freshness, and if soaked in water thirty minutes before cooking they are as sweet and fresh as those direct from the garden.

Now while there is no sale for grapes, one of these machines will be worth a thousand dollars on a vineyard in making Raisins.

With one of these machines you are independent of the local market.

The only locomotive whistle heard in San and we think the people of San Diego ing their gaze from the Tom Scott Jack o' lantern, and turning their attention to something with a local habitation and a name.

Ir now seems more than probable the Southern Pacific and the Texas Pacific-that we may reasonably hope for an early completion of a Southern trans-continental road. It has been apparent to all and admitted by the unprejudiced that division of the aid between the two companies with the provision that each should build until their respective roads met, as did the Central and Union Pacific roads, was the speediest and most practical way of securing the much needed thoroughfare. The bill now before Congress indicates that the matter is fully understood at the Capitol. The Utopian idea of giving the Texas Pacifie Company a monopoly of the route, the right to build that entire road and three hundred and tifty million dollars to build it, now has no advocates and is already regarded as a dead issue. Let us have the road as soon as possible, and in order to do this, let those build it who will loose the least time in its completion.

IT now seems evident that the city will lose none of its funds by the suspension of the Bank of TEMPLE & WORKMAN, but perhaps we may reasonably conclude that the escape was more through good luck than good management. It is no fault of the Council that every dollar was not engulfed in the maelstrom of insolvency. Time and again the HERALD has urged on the municipal authorities the importance of throwing a guard around the city's funds which would protect the people against the possibility of loss, but the warnings were unheeded and "oh it's all right," was the only response that could be elicited. Now it is time this fast and loose policy ceased. The people are already loaded with taxes, and the money they strain every nerve to pay must be guarded and economized. If there is nothing in the charter which authorizes the Council to protect the city and canon is boiling, the fields are against loss, then in the name of the people, let us appeal to the Legislature for the much needed authority, and when we get it, let it be the duty of every citizen to see that men are elected to office who will not only obey the law themselves, but insist that others

# The City Funds.

Yesterday a rumor was started and rapidly circulated to the effect that the city's funds were endangered by the suspension of the Bank of TEMPLE & WORKMAN. The rumor was credited because to many, the circumstances connected with the custody of the city's funds were not clearly understood. Some months ago the Council by resolution authorized the City Clerk to advertise that bids would be accepted for the custody of the city's funds, the award to be made to the firm giving the highest rate of inter- demolish several of them. with satisfactory security. TEM-PLE & WORKMAN's bid and security being satisfactory, the money was ordered to be deposited in their Bank.

To this order the City Treasurer demurred. He held that he had given bonds for the safe keeping of the money, and that he had a right to deposit where he pleased. The Council never to Mexico, has been offered English enforced its order and the Treasurer mission.

never complied with the resolution, but continued to exercise full control of the funds so far as naming the place of deposit was concerned. With this explanation of a heretofore not understood matter, we proceed to give the information gleaned from Dame Rumor's thousand stories of yesterday. After hearing that the funds were part lost, half lost and all lost, forty or fifty times from as many different persons, we proceeded to interview City Treasurer MELLUS, and he gave us this statement: The funds are all safe; he | G Vandermork, P Judd. drew the money on general deposit out of TEMPLE & WORKMAN'S Bank some time ago and he had but four thousand dollars in the suspended Bank when it closed its doors, which is on special deposit. The City Navigation resumed its session this Treasurer makes this statement and we give it to the HERALD readers in evening adjourned to Sacramento. order that they may know what is The committee was at loggerheads said by those who ought to know on both days of its session. A little talk with bee men enables us to hope that the season for this work is to be a very propitious one, as the colonies are reported as strong and vigorous, the feed promises to be abundant, and the bee, up to this time, not merely feeding himself but, in some places, storing some honey, as at Dr. Johnson's apiary, on the Sweetwater, where he has eighty colonies.

The weather for some days past has been quite too cool for this section of the country, accompanied by frosts, which, we are told, are unusual. Old residents say this is the coldest Winter they have ever seen in San Diego. Yesterday evening the wind was blowing from the North, right from the mountains of San Bernardino, which are covered with snow; but fortunately are an hundred miles off.

At Mrs. Smith's place, near the Cajon, a sort of observation of the rainfall has been kept. By it, nearer two inches than one of rainfall occurred up to Friday when the weather cleared away. All along the road yesterday we found water standing in places. Another authority for the rainfall in that valley is one inch, but we are disposed to divide between the two esti-mates, and place it above the one and below the other.

Our hotels are filling up with East-ern guests. The weather is delightful. A letter from Julian says it has green and the farmers anticipate a grand season. All the mines are looking well and promise richly. There is not an idle man in the camp.

Republican National Convention. Washington, D. C., Jan, 13.—The Republican National Committee met this morning at the Arlington House and was called to order by ex-Governor Morgan, of N. Its duties were very simple, being the fixing of a time and place for holding the National Convention. The Clerk Hon. Wm. C. Chandler, called the roll, when it was found that 18 original members were present and 18 by proxy. Quite a lengthy discussion was had on the relative merits of different cities as proper places for holding the Convention. Gen. Garfield spoke at length in favor of Cincinnatti or Cleveland, "not only because Onio is one of the leading States, but because the Republican party cannot afford to lose her vote in the coming contest." # Page & Gravel.

Mr. L. E. Page, of the firm of Page & Gravel, returned to the city by the chief object in visiting the city was to lay in a large supply of material for his carriage and wagon manufactory. The great success of this firm is owing to their strict attention to the details of their business. They are both prac- Diamonds, tical workmen, and while one is engaged at the forge the other plies the plane and hammer and chisel. Though empleying a large force of workmen, they do not allow any piece of work to pass without their own careful supervision. To their especial merit as mechanics is chiefly due the renown line in Southern California, and as good as can be found world over. From modest beginnings the establishment has steadily maintained its reputation, until it now stands head and shoulders above every manufactory of the kind in Southern California. It would be an act of injustice if we neglected to say in passing that the enterprise of the firm in the way of advertising has been largely instrumental in their success. Like sensible men, they made a first-class article and then told the public about it. They richly deserve all the prosperity they have achieved, and we feel sure that it will increase many fold in the future.

It would be inconsistent with my past life to enter into any newspaper controversy, and especially in relation to my own rul-co.'s drug store, will open the comings as United States Commissioner. I will, however, give you a brief text of the cases that came before me a few days since. Some very respectable miners from the San Fernando mining district, in this county, came before me and complained that a large number of wood choppers were engaged in cutting cord wood on their mining claims some of which claims were alleged to thereupon issued orders for the arrest of four of the supposed trespassers. On the examination it was shown that about two hundred cords of wood had been cut in the "Great Eastern" canon and within the San Fernando Mining District, but it did not appear that any of it was cut within the boundaries of any particular mining claim location. It was shown by the defense that the Superintendent of the Southern Pacific Railroad Company entered into a contract with Cyrus Cotton to cut one race will be on the square, and the thousand cords of wood for the Railroad Company, on government land, adjacent to the San Fernando Tunnel. That the two hundred cords was cut under that contract and by the direction of Cotton. That one hundred and twelve cords had been paid for by the railroad company and that the whole was intended or required for fuel in running three engines in use, in pumping water and hoisting dirt, stone &c. into the tunnel. The wood a ppears to have been cut about two miles from the tunnel, and the contract with Cotton embraced an agreement on his part to build a road from the tunnel to the wood. There was no evidence that any of the wood had been converted to any other use, but on the contrary that none of it had yet been hauled away. The proofs further developed that all the mining claims located in the San Fernando district

SEWING MACHINES!

other.

A trial will convince the most skeptical of its superiority over all others, being adjustable in all its parts, every movement being positive, with a perfect tension and adjustable feed. It is simple, strong, durable and cheap, light and rapid running, doing all the different varieties of sewing from the finest fabric to the heaviest cloth or leather.

The latest improved Wilson will not run backwards, thereby avoiding the breakage of needles and thread and necessitating the removal of the goods from the machine while winding the bobbins as is the case with all other machines. HIGHEST PREMIUM AT THE WORLD'S FAIR, Vienna 1873. A very important improvement has lately been added to the Wilson. Call and see it before purchasing elsewhere. To try one is to buy one.
